PRESS RELEASE

HEALTHWAY MEDICAL GROUP TO WELCOME THE BRIDGEPOINT HEALTH CLINIC NETWORK, STRENGTHENING ITS INTEGRATED HEALTHCARE ECOSYSTEM

Singapore, 3 July 2026 – Healthway Medical Group (the “**Group**”), a leading healthcare provider in Singapore, today announced the proposed acquisition of Bridgepoint Health to strengthen its primary care network as a key foundation of its integrated healthcare ecosystem.

This strategic expansion will add 16 islandwide clinics to the Group’s primary care footprint, significantly enhancing its ability to deliver accessible, coordinated and patient-centred care. It also brings together a broader team of 75 healthcare professionals, strengthening clinical collaboration, knowledge sharing and operational excellence across the Group’s primary care platform.

Together, the enlarged Group is expected to serve more than 1.3 million patient visits annually across its clinics and medical centres.

Mr Abram Suhardiman, Chief Executive Officer of Healthway Medical Group, said: “We are pleased to welcome Bridgepoint Health into the Group. The deep trust and strong relationships they have established within local communities are incredibly valuable as Singapore’s healthcare landscape continues to move toward more preventive, multi-disciplinary and community-based care. Together, we will be better positioned to support patients across their healthcare journey and meet Singapore’s evolving healthcare needs.”

Michael Coleman, Chief Executive Officer of Bridgepoint Health, said “Bridgepoint Health’s mission and model of care is rooted in relationships, prevention, and long-term trust with the communities we serve. This transition not only aligns, it positions us for the future — to grow sustainably, to scale responsibly, and to deepen the impact we can make in primary care.”

This development is subject to customary closing conditions.
